

Autodesk Inventor 2008: Essentials

Add the Power of 3D

Accelerate and simplify the concept-to-manufacturing process with Autodesk Inventor 2008 training.

Course Objectives

This course is designed as a starting point for new users of Autodesk Inventor 2008. With this training, students will learn the fundamentals of 3D parametric part design, assembly design, and creating production ready part and assembly drawings.

After completing this course you will be able to:

- Learn proper techniques and workflow
- Create, place, and constrain components
- Simulate mechanisms, animate assembly designs, and check for interferences
- Document designs and assemblies
- Follow drafting standards while dimensioning and annotating drawing views

Course Length

5 days

Prerequisites

None.

Training Facilities

Bell Canada has a state of the art training facility in Winnipeg that can accommodate up to 10 students, keeping the class size small for maximum attention.

Ask about our Custom Training

Through consultation sessions, our trainers will develop a course plan tailored to the needs of your company. Phone us today to find out more details on our private custom training.

"I definitely learned more about the software program by taking the training! The instructor was extremely knowledgeable and answered all our questions. This will really help us with the implementation and use of Inventor."

Bill Lucenkiw, Century Steel
