

## AutoCAD 2008: Creating and Presenting 3D Models

It's what your ideas have been waiting for.

Take your AutoCAD designs to the next dimension (3D!) with AutoCAD training.

### Course Objectives

This course provides a basic understanding of how to design and modify 3D models using AutoCAD software. Creating 3D models helps users better visualize and present designs that are created with CAD. This course introduces students to the fundamental concepts and workflows for creating 3D models with AutoCAD.

After completing this course you will be able to:

- Create and modify both solid and surface models
- Present their designs while they are still being created using visualization tools such as visual styles, model walk and fly throughs, materials, and lighting.
- Output 3D models from the CAD system to either paper or a distributable, electronic version. Work with Layouts

### Course Length

3 days

### Prerequisites

AutoCAD Level 1 or equivalent experience

### Training Facilities

Bell Canada has a state of the art training facility in Winnipeg that can accommodate up to 10 students, keeping the class size small for maximum attention.

### Ask about our Custom Training

Through consultation sessions, our trainers will develop a course plan tailored to the needs of your company. Phone us today to find out more details on our private custom training.
