

Autodesk Inventor 2008: Sheet Metal Design

Add the Power of 3D

Accelerate and simplify the concept-to-manufacturing process with Autodesk Inventor 2008 training.

Course Objectives

Learn how to create and manage sheet metal designs. The course focuses on basic sheet metal concepts and techniques, and builds on them to include complex modeling practices for forming sheet metal parts, assemblies, and drawings. After completing this course, you should be able to review various construction techniques, create and automate sheet metal design tools, and document sheet metal designs.

Course Length

2 days

Prerequisites

None.

Training Facilities

Bell Canada has a state of the art training facility in Winnipeg that can accommodate up to 10 students, keeping the class size small for maximum attention.

Ask about our Custom Training

Through consultation sessions, our trainers will develop a course plan tailored to the needs of your company. Phone us today to find out more details on our private custom training.
